

# TAREK KHIDER

## Infrastructure Operations

t.khider@outlook.fr | +33 7 71 14 56 29 | Paris, France

### WORK EXPERIENCE

#### DC Operations Technician III

August 2024 - Present

Amazon Web Services, Paris

- Respond to infrastructure incidents and rack failures, executing emergency recovery workflows to restore infrastructure availability.
- Perform hardware diagnostics on host servers to isolate and swap faulty components.
- Troubleshoot Layer 1/2 network connectivity issues and execute critical hardware replacements.
- Execute preventive checks that reduce hardware failures and keep infrastructure within SLA targets.
- Install servers and handle physical infrastructure tasks (racking, cabling, patching).

#### System Administrator

July 2023 - July 2024

Winamax, Paris

- Administered core identity and network services, including Active Directory, ADFS, DNS, DHCP, and WSUS.
- Maintained Cisco switching and wireless infrastructure, enforcing network security policies.
- Managed 500+ multi-platform endpoints (Windows, macOS) using JAMF, handling policy enforcement, application deployment, and version control.
- Implemented infrastructure monitoring and alert systems, utilizing PowerShell and Bash scripts to automate administrative tasks.

#### IT Operations Technician

August 2020 - June 2023

Groupe Iliad, Paris

- Supported 10,000+ endpoints, resolving hardware and software incidents.
- Installed and configured network devices (switches, routers, access points).
- Resolved complex endpoint failures involving OS corruption, hardware faults, and network misconfigurations.
- Created knowledge base articles and internal procedures that reduced recurring tickets.
- Automated routine tasks with scripts, cutting manual workload and speeding up issue resolution.

### SELF-HOSTED INFRASTRUCTURE PROJECT

- Run a Proxmox hypervisor hosting multiple production Ubuntu VMs for workloads (including Nextcloud, GitLab, and media automation services) along with several LXC containers.
- Maintain automated CI/CD pipelines using a self-hosted GitLab instance to continuously deploy and update production Traefik configurations, DNS, and Docker Compose workloads.
- Handle traffic ingress using Traefik and Nginx Proxy Manager, utilizing custom local DNS with all internal and public-facing routes secured via Let's Encrypt SSL certificates.
- Maintain a 3-node Kubernetes cluster running on Talos Linux.

### SKILLS

- DevOps & Automation: Terraform, Ansible, Docker, Python, Bash, GitOps, CI/CD
- Systems & Infrastructure: AWS, Linux, Windows Server, Active Directory, ADFS, WSUS, JAMF
- Networking & Security: VLANs, Firewalls, Load Balancing, Reverse Proxy, Cisco Switching, DNS, DHCP
- Monitoring & Observability: Prometheus, Grafana

### EDUCATION

#### 42 Paris | 2025 – 2027 (Expected)

Core Topics: Low-level systems programming (C/C++), Unix environments, algorithms, data structures, concurrency, multithreading, and network programming.

#### Doranco | RNCP Niveau 6 "Administrateur Systèmes et Réseaux" | 2022-2023

Core Topics: Advanced networking, Linux system administration, advanced Windows Server administration, security fundamentals, and DevOps principles.
